## “RELEVANT LEADERSHIP”

*Are you keen to take your leadership to the next level?*

- What are the pitfalls for today's Leaders ?
- Why and where Leadership Fails ?
- What is the Importance of Execution in Leadership ?
- Why Brilliant, Intelligent Leaders alone are not enough for Survival ?
- What is the one thing different between "Successful" and "Burdened" Leadership ?
- Why calibrating on the "Change" is a crucial skill every Leader must have ?
- Why ever moving targets - ever changing market - constant adaptability are three important norms every Leader must get used to ?

### Some thoughts from the facilitator :

**Team members, today, are highly qualified achievers, who don't need to be told what to do. So how can you raise their level of leadership ?**

The answer is almost a no-brainer – “Help the Team to Think Better”. Our Relevant Leadership program will teach you how to correctly grasp the need of the situation (which is always partly constant and partly varying) and of the group (which includes the followers, their needs and values).

**Leadership is all about creating Leaders, capable of taking your organization to the next level. How can you do this ?**

Our Relevant Leadership Program will enable you to learn, evaluate and adapt yourself. You will now be able to share and teach, thus bringing out the leader in them.

**Relevant Leadership requires fine tuning with the team and situation but then why is success elusive ?**

Knowing where the organization is, in the Corporate Lifecycle, is a key element of Relevant Leadership. This is where I strongly emphasise a good dose of experiential learning, not mere theory and concepts. As much as knowing “**what to do**” is important, it is equally essential to know “**what not to do**”.
